

## Seagulls Reported

Several of our reporters coming from dover and 2 in Margate that seagulls are becoming violent attacking small dogs and cats. One reporter explained that seagulls were ganging together, picking up a dog, and killing it mercilessly, to then consuming its pieces. Seagulls attacking other birds not normally doing so and do appear more muscular, with black stripes rather than their normal colourations perhaps genetically modified? Not 100% sure yet if its true, but something that everyone should be concerned about is should we take our dogs for a walk or even small babies. The seagulls perhaps came from Asia and could have been apart of scientist experiments happening in Asia that have had a breakout. Report your local environment agencies and your local police.

## **KILLER SEAGULLS REPORTED IN RAMSGATE**

When you're out and about be wary as we don't want this to get worse. Do not be afraid to use physical violence if they start attacking or anyone else. We recommend to not feed these seagulls as they are a pest anyway, plus we don't want them disturbing anyone else.

These seagulls are in fact not evolving they are developing as they are going back into their old ways of the dinosaurs, genetically modified to go back and kill without warning. The black stripes are quite distinctive, others are mainly white, but these have a clean stripe and are easy to spot.

The Number To Use When Reporting These Foul Creature Sighting is 01843789756

# Aliens in the White House?

Aliens? You may ask, Aliens have visited earth throughout history in particular, in times of crisis, or to advance the developing of civilisation.

As we can observe the Egyptians were making/building pyramids with no technology or any methods to help them.

Which Aliens are believed to help give methods to help them and its believed that because it will be such a disaster that if either trump or Biden becomes president, aliens will return to the world to run the USA. To avoid a world catastrophe.

Anyway, who would know any different if trump, Biden or an alien was running America.

An hour after each celeb got random notes with the letters cut out of the newspaper saying if you wanted to see them again we want 1 million dollars placed in the bin by the park at 5 o'clock or we will give them away never to be seen again

The police advise the celebs to not pay up as the whereabouts of the dogs are unknown.

# Breaking News!! Celebrity Dog Napping

The celebs lost their dogs while on a playdate together as Jennifers dog is four called Clyde, she rescued him a few years ago, while Simons dogs are Yorkshire terriers they are six years old they are called Squiddly Didley and Freddie. Will Smiths dog is called Baby and is eighteen and got her when filming 'I Am Legend' and she is filmed in it too. Ryan Reynolds dog is two and he resued him and his name is Buster.

A Van was pulled up and six masked people came out and shouted "FREE THE DOGS" as they picked up one dog each and took them into the van, the owners tried to get them but fought them off with the dogs barking.

They had black masked on and each had a piece of steak in their hand to entice the dog to come with them, they clearly planned beforehand and came prepared, the van consisted of yellow with a picture of scooby doo on the outside so very recognisable, If anyone sees the van must contact the nearest police station with the information.

# VOTE

**Gen-zennial Revolution**  
Revolutionising tomorrow, today

## VISION

- Putting **Gen Z** at the forefront of the political movement in the UK
- Policies geared towards **you** - the future of our country
- Promising to improve the economy, health and welfare **of all**

WEDNESDAY  
3RD JULY

## NEGATIVE EMOTIONS ON SOCIAL MEDIA DOMINATE GEN Z'S DECISIONS FOR THE 2024 ELECTION

## GEN Z VOTERS SPEAK: THE FUTURE OF VOTING AND CIVIC ENGAGEMENT

2024

A POLITICAL PARTY YOU CAN RELY ON

### Breaking News

#### Gen-Zennial

Tomorrow being the general election, our aim to put to you, the gen Z generation, at the forefront of the political movement in the uk. The policies are all geared towards alloing more control for you, the future of our country. We promised to improve the economy, health and welfare for all

#### Education Happening

- Scrapping compulsory education for post – 16
- New law to alter school timings
- Scrapping exams system as it currently stands
- Introduction of new subjects
- Abolishing compulsory uniform
- Scrapping university tuition fees
- New improved school fool for all
- Use tax to fund new 'green' homes
- Cut all diesel cars
- Single use plastic scrapage scheme (bring a Stanley cup instead)
- Heavy fines for polluting our seas
- Subsided e 'scooter for school runs

## Teacher is feared lost on mount Everest

Mr Brown, a business and economics teacher reported saying he was a part of a team led by an organisation 'summit climb', it was during the teams bid for the summit in early hours of Wednesday 22<sup>nd</sup> May reaching South Col. Mr Brown may have been caught in a human traffic jam, and it was a century from the infamous death of Mallory and Irvin.

Helicopters cannot fly at the mountain's altitude, so the Summit climb stated 'Unfortunately, despite the weather forecast having been favourable, the group was hit by a storm just below the famous Hillary step at around 9/790m. during this time Mr Brown became separated from the group. We still have a team of experienced mountain guides on the mountain but to date we have no sign of him.'

# Crisis In The Suez

The Suez Canal links the red sea to the mediterranean.

In 1859, the French built the canal to pass through, which allowed a trade route through in which 9.2 million barrels of oil pass through daily and gives Egypt 9.4 billion USD annually.

In the 1950s the Egyptian government took back ownership of the Suez Canal company, at the time owned by a private company, the French, British, and Israeli governments sent troops to try and prevent this, but they had to withdraw. This was known as the First Suez Crisis. Since 2014, there was a civil war going in Yemen between the two main factions of Islam. Houthi rebels, supported by Iran, have tried to take control of the country. Saudi Arabia and UAE, with US involvement have tried to stop their advance on the capital and major cities. 400,000 deaths to date. Ceasefire talks were had. On October 7<sup>th</sup>, Hamas terrorists launched an attack on Israeli settlers. The Houthi forces then announced that they were siding with Hamas firing missiles into Israeli territory and hijacking US ships passing through the Suez Canal. As this continues, Egypt is losing 3-4 billion US dollars annually, this is a massive problem to the economy, it was already impacted by Covid, Ukraine/Russia war and the consequences of the conflict in Gaza.

Since the Houthi rebels hijack ships in the canal, ships are forced to go around the canal, almost doubling the distance, massively increasing the fuel cost and greenhouse emissions. The crisis can affect companies, people will lose jobs and companies can go bankrupt.

# Meet the scientist who believes plants are conscious.

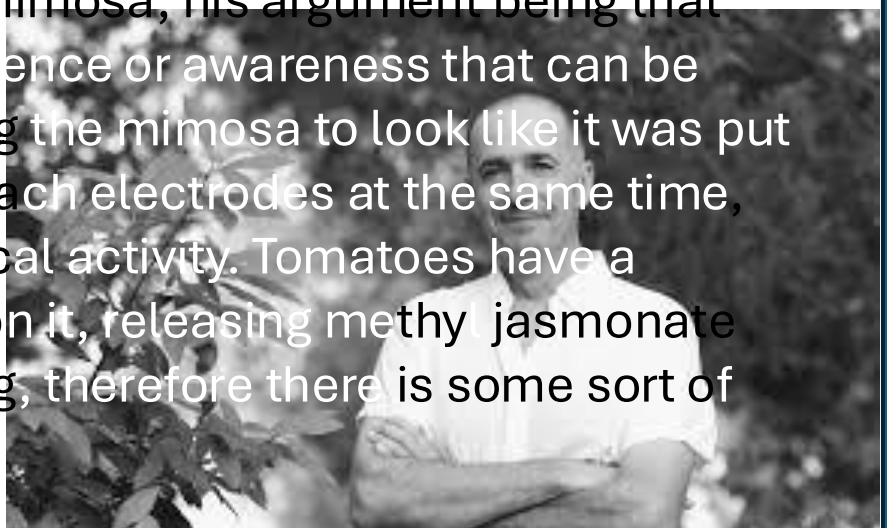

Meet a Scientist who believes plants are conscious A physicist was testing things at his house and the results shocked him being a seismograph, he decided to investigate with a detector and as he got closer to his neighbours garden and appeared an interference to his detector, caused by his neighbour pruning his roses.

## Paco Calvo

A University of Murcia in Spain, that research plant intelligence, the Mimosa plant appears to “learn from experience” when it stops folding up, he believes that plants have different kind of intelligence through their vascular system, which have a network of cells.

Paco aims to understand what unites all organisms in life through understanding intelligence that does not require brain. Paco did a test with using anaesthesia on mimosa, his argument being that plants have some kind of conscience or awareness that can be affected by anaesthesia, causing the mimosa to look like it was put to sleep. He found that if you attach electrodes at the same time, you will see the waves of electrical activity. Tomatoes have a reaction to caterpillars feeding on it, releasing methyl jasmonate that make the plant unappetizing, therefore there is some sort of consciousness or awareness.

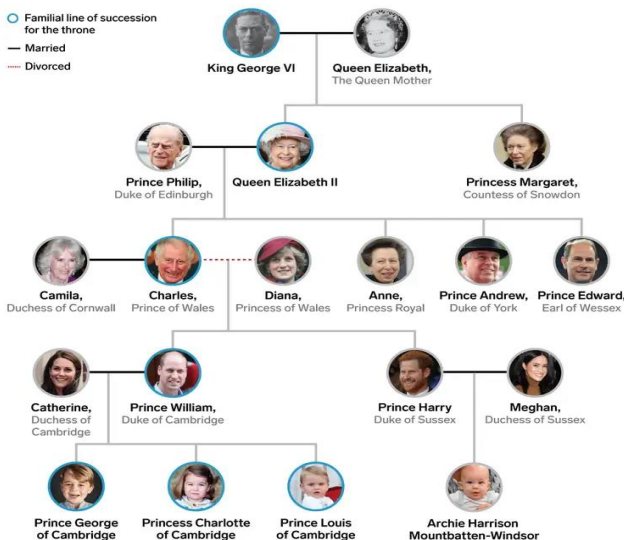

# Local Environment Issues

The local environmental agency, have found issues in our environment with Kent hosts hundreds of wild beavers found in canterbury and even as far as Ashford, they keep water clean and stop flooding. The first baby bison was born in the winter and people hadn't seen a Bison in 1000 years, they naturally control forests otherwise humans have to cut down trees.

## ROYAL NEWS!

Trouble has been in the house of Windsor-succession, Prince Michael of Kent a member of the British royal family who is the 52<sup>nd</sup> in line of being on the throne. He is the younger son of prince George, the duke of Kent and the princess 'Marina' of Greece and Denmark. He is the first cousin once removed of Charles III. Mixed up with another Michael at the same time and at the same hospital.

This what our community do to combat climate change

Over the weeks, a big, solar farm company has had the idea of making 201 giant container batteries. This would be helpful to us for us because when it is windy, we rely wind turbines to supply us with electricity since they captures the wind's power and converts it into electricity. But when it's not windy, that's when the containers come into hand by storing all of the energy collected from past days and using it for when we need it.

These companies are now extending this idea by adding another massive solar farm site right by Margate. This will supply 10,000 homes. But this leads to a big increase of angry people who are concerned about the environment. So, the company has told them that, so they don't worry, they'll be planting flowers, trees, grass ext.

# No More School After 11?

Ending school at 11 years old would result in social and economic problems. A lot of people would be underqualified for jobs, as they do not receive proper education, resulting in a worse overall economy of the country. Job market would be smaller due to an increased amount of job applicants. Children would become bored, which could lead to increased crime rate, drug abuse and antisocial behaviour. Police would be more required in areas to regulate crime. So overall, it is a much better idea to change the school curriculum to encourage children to stay in school, children should be taught things about adult life, such as taxes and future responsibilities, while also giving them a choice to study the things that interest them.

# New Chemical Discovered!?!

Today is an important day for science. Novium, a new chemical element has been discovered by Dr Amelia Carter in an accident while attempting to visualise the big bang at the particle accelerator, she reported her progress in her notebook. On the 2nd of January 2024, Carter started her research, and after 2 weeks of testing they were not close to their goal, so on the 18th of February, Carter and her team increased the power of the accelerator, resulting in a disastrous power surge, Dr Wilde and professor Kear, researchers in Carter's team were both injured and immediately hospitalised. Fortunately, both survived and only received minor injuries. The team, checking on the accelerator next day, found that the power surge created a new element. Weeks of testing passed by, on the 16th of March, the team found that the element's atomic and mass numbers are 125 and 325 respectively. 3rd of May, the team found the elements properties: it is a superheavy element, amazing conductor of electricity, very powerful magnetic properties and it only reacts in specific conditions, which makes it ideal for space engineering. On 28th of May, IUPAC confirmed the discovery, and today, on the 3rd of July, the element is released to the public.

## **BREAKING NEWS!**

A wild-life sighting has been broadcasted having a wild elephant walking Infront of the sports hall, be wary they aren't all passive creatures. Contact the police station if there is any harm done or has happened to the elephant or people. If you are near this elephant do not approach, it maybe hostile.

## THE CHOICE IS **CLEAR** for ACNE

Dermatologist recommended *Clear At Last*™ clears acne, and prevents new breakouts.

Stop Acne in two easy steps!

If you're tired of treatments that don't get results, then you may be interested to try *Clear At Last*™. *Clear At Last* will not only treat existing breakouts and prevent new ones, but will also prevent new breakouts from happening.

*Clear At Last*'s active ingredients are clinically tested and dermatologist recommended, so you know it's safe, and it works. *Clear At Last* is a gentle and effective way to achieve clear, healthy looking skin.

But the best way to see it all, is stop the embarrassment and contact us toll free at 1-800-380-0774 Ext. A-1000.

- Proven Ingredients
- Dermatologist Recommended
- Effectively Treats Acne
- Non-irritating Ingredients
- Gentle, Immediate Results
- Exclusive two-step process
- Active Ingredients with Proven Results

All it takes is one toll-free phone call  
**1-800-380-0774 Ext. A-1000**

(One month for 30 days or older for call.)

We also offer a highly effective treatment for Rosacea, Psoriasis and Ulcer-Acne Dermatitis.

## UK sewage spills

these often have untreated sewage, after heaving rainfall. This then proceeds to overflow and go into seas and rivers. This makes you have to wait for the water to get clean again.

This is becoming an increasing problem. Some of the reasons behind this: the system is from the Victorian system which was quite a long time ago. Not only are there now more people using the same sewage system, you quickly realise that we are now using A LOT more water than before. Since now we have a lot more showers and baths, but then people didn't use them as much.

As the population has grown, so has the urbanisation, such as: buildings, roads and gardens. But ages ago, these areas were mainly just fields and woods.

Unfortunately, the sewage company's are getting the blame for these sewage spills, even though they have not been provided with the funding to prevent this from happening.

St Lawrence's response is a 'self sufficient water system'. We are using a filtration system - input - to water various places of the school. Although, right now we already have one of these. We are doing this so we are not dependant on the main water supply.

# Is High School Mathematics relevant in today's technological society?

People ask;

Why do we need numbers

Numbers are everywhere

Amazon - no war comfortable for living

Why do you need money - trading

Why do we need to go to the moon - maths needed for the moon

Why do we exercise - gym

Maths - exercise brain - gym for the brain

Need basics to understand complex things

Things that people don't understand is how, Data is everywhere, and statistics underpin every job, maths is needed in building designs Pyramids to Burj Kalifa - improved technology Takes hard work to start from the beginning Engineering consists of some form of maths; we won't use school maths in future but makes us understand advanced maths

Things are changing rapidly

Advanced technology

Advanced instruments

MRI scans improved

Fashion - patterns - maths

AI - maths

AI - further advances technology

No maths - buildings fall down

Engineering faults/malfunction

Walkie talkie building - certain time of the year burns cars due to light

Maths not needed leave it to Ai

Maths not needed at school

Maths is everywhere

# The Jollof Wars

## Nigeria vs Ghana

The Jollof Wars include the piquant rice dish called Jollof, that is a medley of rice, tomatoes, and spices. Jollof's origins can be traced to Senegal's ancient Wolof empire and medieval state in the 1300s. As the Wolof empire grew and dispersed along the west African coast and so did the recipe, which was named after one of the biggest Wolof states. The rivalry between Nigerian and Ghanaian styles of jollof is a debate among west Africa and beyond. The main difference between the two is the type of rice used in the cooking. Nigerian jollof uses long-grain rice, which is sturdier and provides more flavour absorption, while Ghanaians use basmati, a more aromatic rice type, which adds extra flavour, therefore, Ghana jollof wins the debate.

### Brown Beats Tatum for NBA Finals MVP

Brown vs Tatum MVP debate: Brown is a more defensive player, has on average more blocks than Tatum, while Tatum has more minutes, rebounds (7.8), assists (7.2) and points (22.2) per game, leading the team. Brown was not too far behind, averaging 20.8 points, 5.4 rebounds and five assists per game, and shot better from the field than Tatum (44% to 38.8%) and often guarded Luka Doncic and Kyrie Irving. Even though Tatum outperformed Brown in almost every category, Brown won the Finals MVP with the score 7-4 among the 11 media members who voted on the award.

# SUDOKU

Edited by Margie E. Burke

Difficulty: Easy

	2		1	7	9		6	
	3		6	4				2
			2					
			3	5				6
	9			8				
8	1					5		
	6		5				2	4
	4	2	7	9				
7								

## HOW TO SOLVE:

Each row must contain the numbers 1 to 9; each column must contain the numbers 1 to 9; and each set of 3 by 3 boxes must contain the numbers 1 to 9.

Answers to Last Week's Sudoku:

8	6	3	9	1	7	4	2	5
7	1	2	6	5	4	3	9	8
5	4	9	2	3	8	1	7	6
4	3	5	8	2	1	7	6	9
6	2	7	3	9	5	8	1	4
1	9	8	7	4	6	5	3	2
2	8	1	5	7	9	6	4	3
9	7	6	4	8	3	2	5	1
3	5	4	1	6	2	9	8	7
